

Information Message Banner

Product specification

Introducing the Information Banner Extension for Shopware from PIT Solutions– a powerful tool designed to enhance your online store's communication capabilities. This feature-rich extension enables you to display important messages, announcements, promotions, or any other information like maintenance timing prominently on your storefront, ensuring that your customers stay informed and engaged.

Features

- Enables admin users to show customized information notification message in the frontend.
- Message can be shown all the time until it is disabled or can be scheduled to display/hide automatically within a time interval.
- Customer can close the banner using the close button and admin will be able to configure the cookie lifetime, for example 1 day. Then the banner will not be displayed in the current browser window for 1 day.
- No need to flush cache since the banner display is implemented based on AJAX request.
- Supports access control for admin users.
- Ensure seamless user experience across various devices with responsive banner designs.
- Possibility to add links to relevant pages : Direct customers to specific product pages, promotional offers, or important announcements with clickable banner links
- Adjust font styles, and colours to create banners that align with your brand aesthetics.
- User-friendly setup with intuitive configuration options, allowing you to start using banners without hassle.

Empower your Shopware store with the Information Banner Extension and transform the way you communicate with your customers. Keep them informed, drive engagement, and enhance the overall shopping experience seamlessly. Elevate your online presence with a tool designed to deliver your messages effectively and stylishly.

Prerequisites

Shopware 6.1.x – 6.3.x

Installation

To install the Information Message Banner module, follow the steps below.

Step 1: Download General Component & Information Message module extension and unzip it.

Step 2: Activate both plugins in your Shopware 6 installation via plugin manager and open the information message plugin configuration.

Step 3: Enable the feature by selecting Yes or Time interval option and configure the rest of the fields.

Step 4: Save the configuration and user will be able to see the information banner based on the given configurations.

Screenshots / Video

1. From the Admin backend, go to Settings > System > Plugin

2. Make sure both extension is enabled and click on the config button of banner Plugin.

The screenshot shows the PITS Administration interface. On the left is a sidebar with navigation links: Administration (v6.1.0 Stable Version), Dashboard, Catalogues, Orders, Customers, Content, Marketing, Settings, Sales Channel, Demo Shop 6.1, Headless, Minimize menu, and a user profile for Veronica Costello. The main area is titled 'Plugins' and contains a search bar and an 'Upload plugin' button. Below this is a table of installed plugins:

Plugin	Active	Version
Pits - Quick Login (PIT Solutions AG)	Activated	1.0.0
PayPal Products for Shopware 6 (shopware AG)	Deactivated	1.3.1
Shopware 6 Demo data (shopware AG)	Activated	1.0.5
Pits - Voice Search (PIT Solutions AG)	Activated	1.0.0
Pits Information Banner Plugin (PIT Solutions AG)	Activated	1.0.0
Pits General Component (PIT Solutions AG)	Activated	

A red box highlights the 'Pits Information Banner Plugin' row, and another red box highlights the 'Activated' status. A 'Config' button is visible next to the plugin's version.

Configure Information Message Manager

- Select Yes to display the message all the time.
- Enter the message to be shown on the frontend. Admin will be able to enter the message based on available languages in the sales channel. Admin can insert html tags inside the message field eg: `click me`. Anchor tags will be in the general style of the shop.

The screenshot shows the configuration page for the 'Pits Information Banner Plugin' by PIT Solutions. The page has a 'Back' button and a 'Save' button. The 'Sales Channel' is set to 'All Sales Channels'. The 'Enabled' dropdown is set to 'Yes'. The 'Message' field contains the text 'Shop will be under maintenance from 17:00 to 19:00 on 25.12.2023'. A red box highlights the 'Enabled' and 'Message' fields.

- Select Time Interval to display the message within the time interval and it will automatically hide it after the interval.
