ABOUT SAFERPAY

Saferpay is the easy, flexible, secure and the comprehensive e-payment solution from SIX Payment Services for easier and more secure payment in your online shop.

Worldline is European market leader in payment technology. More than 11,000 payment experts ensure future-oriented innovations and services in over 30 countries. With 45 years of experience, Worldline is an innovative pan-European company that covers the entire value chain of cashless payment transactions with its highly secure payment and transaction services.

SIX Payment Services has been part of Worldline since the end of 2018, making it Europe's largest technology partner for banks and merchants. The tailor-made solutions from SIX Payment Services include a broad portfolio of payment terminals and the acceptance and processing of national and international payments with credit, debit and prepaid cards as well as the smartphone.

ABOUT WORDPRESSPLUGIN

This plugin is implemented to integrate Saferpay Payment methods in Woocommerce. It supports the following payment methods of Saferpay to work with WooCommerce plugin.

- 1. VISA
- 2. MASTERCARD
- 3. MAESTRO
- 4. AMERICAN EXPRESS
- 5. BANCONTACT
- 6. DINERS/DISCOVER
- 7. JCB
- 8. BONUS CARD
- 9. SEPA ELV
- 10. MYONE
- 11. MASTERPASS
- 12. UNIONPAY
- 13. PAYPAL
- 14. TWINT
- 15. PAYDIREKT
- 16. IDEAL
- 17. EPRZELEWY
- 18. POSTFINANCECARD
- **19. POSTFINANCE EFINANCE**
- 20. APPLEPAY
- 21. CREDITCARD (SAFERPAY FIELDS)
- 22. KLARNA

This plugin supports all the features of online payment methods like payment capturing, refunding & cancellation. All these payment operations are done in the WooCommerce backend & will be synced to Saferpay account also.

Worldline / IX Payment Services

REQUIRMENTS

To install and configure Saferpay plugin in WordPress, the following is required:

- WordPress (5.0 to 5.5.3) and WooCommerce (tested 3.9 to 4.5.1) plugin.
- License for the Saferpay.
- A valid Saferpay account with at least one active Saferpay terminal through which payments can be carried out.
- API credentials like Terminal ID, Customer ID, JSON Username and JSON Password for the Saferpay Live- and/or Test environment.
- Valid acceptance agreement for payment methods.

INSTALLATION

To install Saferpay Plugin, follow the steps below.

Step 1: Download Saferpay plugin ZIP package.

Step 2: Go to WordPress admin dashboard and visit Plugins » Add New. After that, click on the 'Upload Plugin' button on top of the page.

Step 3: Then a plugin upload form will appear. Here you need to click on the 'Choose File'button and select the plugin file you downloaded earlier.

Step 4: After you have selected the file, you need to click on the 'Install Now' button.

WordPress will now upload the plugin file from your computer and install it for you. You will see a success message after the installation is finished.

Add Plugins Upload Plugin			
If you	ı have a plugin in a .zip format, you ma	y install it by uploading it	here.
	Choose File No file chosen	Install Now	

Step 5: Once installed, you need to click on the Activate Plugin link to start using the plugin.

Manual installation via FTP

In rare cases, your wordpress hosting provider may have file restrictions that could prevent you to install a plugin from the admin area. In this situation, best way is to install the plugin manually using FTP.

First you will need to download the plugin's source as zip file. Next, you need to extract the zip file on your computer.Open the FTP client on your computer and connect to your website using the login credentials provided by your web host. Once connected, you need to go to the /wp-content/plugins/ folder on your website, and then upload the extracted plugin folder to that path.

After uploading the files, you need to visit the WordPress admin area and click on the Plugins link in the admin menu. You'll see saferpay plugin successfully installed on the plugins page. You need to click on the Activate link below the plugin to start using it.

After successfully installing the plugin, you can either enable test mode or live mode

SAFERPAY TEST ACCOUNT

Saferpay offers the possibility to test all interfaces especially for your created test account.

The Saferpay test account allows you to implement Saferpay into your system and make test transactions over several payment simulators before going live.

https://www.six-payment-services.com/en/site/e-commerce-developer/testaccount.html

Test mode configuration

Products	Saferpay Basics	
AnalyticsAppearance	Enable Test mode	Test Mode Place the payment gateway in test mode to using test API keys.
🖌 Plugins 🌀	Saferpay License	Saferpay Business Choose your license.
 Tools Settings 	Test API Base URL	https://test.saferpay.com The test API base url given by the Saferpay.
General Writing Reading	Test Customer ID	3 24xxxx Get your test customer id as given by the Saferpay.
Discussion Media Permalinks	Test Terminal ID	17xxxxx 4 The test terminal id as given by the Saferpay.
Privacy Saferpay Settings	Test JSON Username	API_24xxxx_127xxxxx The test JSON username given by the Saferpay.
Increase Maximum Upload File Size	Test JSON API Password	The test ISON API nassword as given by Safernay

We need to enter the provided test credentials into Saferpay settings:

Menu → Settings → Saferpay Settings

Initially, enable test mode and we need to enter the provided test credentials into Saferpay settings:

Required Data:

• Test-Customer ID

- Test-Terminal ID (eCommerce Terminal).
- Test JSON API username.
- Test JSON API password.

Live mode configuration

Switch to Saferpay Operation mode to live & we need to enter the provided live credentials into Saferpay settings:

The following data is required

- Live-Customer ID
- Live-Terminal ID
- Live JSON API username
- Live JSON API password

Note: If you are using WPML, you need to create "Saferpay Checkout" page in all supporting languages in order to make translation works properly. Refer screenshot below

🚷 Home > Saferpay Checkout

Saferpay Checkout

A Please do not refresh or close the window.					
Pay with a card					
Card number *	This input is required.				
Valid until *					
Owner name *					
Card verification code	?				
	Cancel	BUY			

CONFIGURATION

Saferpay Plugin configuration includes two section

- 1.Saferpay general settings
- 2. Payment method specific settings

SAFERPAY GENERAL SETTINGS

Configure general Saferpay settings from Menu \rightarrow Settings \rightarrow Saferpay Settings

The following configurations are available in Saferpay basic settings

- Enable Test Mode: It defines the Saferpay Operation mode. If it is enabled, it allows the payment gateway to work in test mode by using test API keys otherwise it will work as live mode. By default, test mode is enabled.
- 2. Saferpay Licence: Choose the Saferpay licence you own. Saferpay has two licenses:
 - Saferpay eCommerce
 - Saferpay Business

In case you have Saferpay Business without the corresponding license, the API will throw an error.

3. Test API Base URL: These fields already have default values of API base URL.

Eg: <u>https://test.saferpay.com/api</u>. Note: Recommended not to change it in ideal case. Changes applicable only if there is an update in base test url from Saferpay side.

- 4. Test Customer ID: Enter your test customer id given by Saferpay while creating a partner account in Saferpay.
- 5. Test Terminal ID: Enter your test terminal id given by the Saferpay.
- 6. Test JSON Username: Enter test JSON username given by the Saferpay
- Test JSON API Password: Enter test JSON API password given by Saferpay. To get JSON API username and password you have to login to Saferpay management interface and go to Settings -> JSON API basic authentication. Please refer https://www.six-payment-services.com/en/site/e-commerce-

developer/integration.html for more information.

8. E-Mails: Saferpay will send an email to the address specified in this field. You can add multiple emails separated by a comma. It is not a mandatory field.

٩	省 Saferpay V2 🔸	😋 9 🛡 0 🕂 New 🗮 English () Howdy, sfwpadmi
1	₩ooCommerce		sujetpuy wii sena an emaii to ans adaress, roa can ada maitiple emais separatea oy a comma.
۲	Products	Check extra level of	No, I don't want extra level of authentication. 🗸
al	Analytics	Autrentication	Recommended for high risk businesses (Jewellery, Electronics, etc.) to stick to the highest level of security
¢	Marketing	Liability Shift Behavior	If no Liability Shift has been granted transactions will be on- 🗸
×	Appearance		Make transactions with liability shift(3D secure). Behavior should override general capture behavior, if NO Liability Shift is given.
ý,	Plugins 🗿	Payment Page CSS URL	
4	Users		You can define here a CSS URL which is included in the payment page. The CSS can only be used, when it is hosted on a server which has SSL enabled.
æ	Tools		Very series de ministra
٥	All-in-One WP	Description of the order	test
	ongration		The order description is shown to the customer on the payment page Use [id] to show order ld. The describtion should describe the products that are sold
+1	securigs	Payment Page Configuration	
Gen		Name	You can define the paymentpage configuration name. You can create new configuration in the backend of Saferpay. If the configuration is not found by
Rea	dina		Saferpay, the default configuration is used.

9. Check Extra Level of Authentication: Recommended for high risk businesses (Jewellery, Electronics, etc.) to stick to the highest level of security. Else you can have it as "No, I don't want extra level of authentication."

10. Liability Shift Behavior: This field determines how to handle the transactions if a fraudulent card is used on the website. When we use this functionality, the liability shifts to the authorizing bank and the store owner receives no claim for any chargeback. It has two options:

• Option A:" If no liability shift has been granted transaction will be onhold, merchant can capture or cancel transaction". Here order placed via fraudulent card will be on-hold and merchant can capture or cancel transaction accordingly.

PIT Solutions

• Option B: If no liability shift has been granted transactions will be auto cancelled. Here order placed via fraudulent card will be cancelled.

11. Payment Page CSS URL: Enter a valid CSS URL which is included in the payment page. This file must be hosted on an SSL/TLS secured web server (the URL must start with https://) Example: https://merchanthost/merchant.css.

Refer https://saferpay.github.io/sndbx/CssiFrame.html for more details.

12. Description of the order: A human readable description provided by the merchant that will be displayed in Payment Page.

13. Payment Page Configuration Name: Here you can define the payment page configuration name. The configuration can be created from Saferpay Back office ('Settings > PaymentPage Configuration'). If the configuration is not found by in Saferpay (setting / backoffice)?; the default configuration will be used.

- 13. Authorization Method: Here you can set authorization method used for payment processing. Two options are available under these settings.
 - a. Payment page During the order processing the user will be redirected from the WooCommerce shop to the Saferpay payment gateway interface to process the payment. On successful completion of the payment the user will be redirected back to the WooCommerce shop. The Saferpay Payment Page Interface is intended for a simplified and universal integration of the payment process by using the PaymentPage form. The Saferpay PaymentPage can be used both with a Saferpay eCommerce license and with a Saferpay business license. All Saferpay supported payment methods can be processes with the Payment Page Interface.
 - b.Transaction Interface (Widget Authorization) During the order processing the user is served with Saferpay payment forms in a pop up within the WooCommerce shop. The Transaction Interface is an extension to PaymentPage Interface. It offers the Hosted Entry Form (HEF) to process card payments seamlessly. This interface can also be

used in combination with Secure Card Data to store/tokenize payment data during the payment process. The Transaction Interface is only for holders of a business licence on the live system.

Saferpay Klarna

Other than general settings, some additional settings need to be configured to use Klarna payment method.

In Saferpay Back office under Settings > Terminals. Please select the terminal you want Klarna activated on and scroll down to Self Service. Please refer the link below

https://saferpay.github.io/sndbx/KlarnaPayments.html

This service handles differently, depending on the Saferpay environment (test/live) you are on, so please pay close attention.

You'll have two options Klarna and additionally, on the Saferpay testenvironment, Klarna Simulator. For Live mode configure Klarna. For test mode configure Klarna Simulator

Additionally, Klarna will be displayed on the country-currency combination pair.

For e.g.: Submitting "CHF" for Switzerland as your Country Code, but selecting EUR as your currency, will cause Klarna to not be displayed!

SAFERPAY FEATURES

DESIGN CUSTOMIZATION

If you want to customize the default design of Saferpay interface, Saferpay provides the following options:

- 1. CSS-Styling: The CSS styling-options can be used over following methods.
 - Payment page
 - Transaction Interface
 - Alias Insert

Note: The CSS file that is referenced by the CssUrl parameter must be stored on a web server that supports HTTPS.

Refer <u>https://saferpay.github.io/sndbx/CssiFrame.html#css-usecss</u> for detailed information.

- 2. Theme: This parameter let you customize the appearance of the displayed payment pages. By default a lightweight responsive styling will be enabled. If you don't want any styling please choose 'NONE'.
- Payment Page Configuration: You can create different PP configurations to be applied over Transaction initialize and PaymentPage Initialize. The configuration itself can be created inside the Saferpay Backend under "Settings > Payment Page Configuration".

<u>Note:</u> If a custom CSS is provided, any design related settings set in the payment page configuration will be overwritten and the default design will be used.

ORDER MANAGEMENT

Orders done by customers are displayed under WooCommerce \rightarrow Orders. Here you can view the list of all orders available.

LIST OF ORDERS

Each order details can be viewed by clicking on Order. Here you can see order details

Under each order, transaction details are displayed in transaction tab

TRANSACTION DETAILS

CAPTURE PAYMENT

In the payment configuration, if "Capturing" is set to "Auto Capture", merchant don't need to do anything from WordPress backend. Payments will be captured automatically by the system.

When the "Capturing" is set to "Manual Capture", merchant will have the option to Capture or Cancel transactions. If we click Capture, transaction will be captured.

CANCEL PAYMENT

Only authorized, but not captured orders can be cancelled. Cancellation of an order prevents any future change from being made to it. If we click CANCEL, transaction will be cancelled.

Order Details Transaction Tab with Capture/CANCEL button

While clicking Capture button, capture confirmation pop up will be displayed. If we click OK button, amount will be successfully captured and order status will be changed to Processing.

TRANSACTION CAPTURE

You can see transaction status and date under history tab mentioned in order detail page.

REFUND PAYMENT

Just like Saferpay transactions, you can also manage the Saferpay refund transactions. Saferpay refund will only be available if transactions are captured properly. If transactions are not captured click 'Capture' button available in transaction tab, then only Saferpay refund button will be enabled. Manual refund buttons are available all the time. Admin should have to do manual refund and update details in Saferpay back office manually.

For Saferpay Refund do the steps mentioned below

- 1. Capture order from backend
- 2. Then click Refund button

ALIAS MANAGER

Alias Manager allows your customer to save the credit card information in his account and to use for the future payments.

Saferpay Secure Card Data or SCD in short, is a service for saving sensitive payment means information in the certified Saferpay data centre. By using SCD, the payment data is separated from the merchant application and no longer comes in contact with it. The stored Secure Card Data can be referred from future payments initiated via Transaction" interface.

This feature is available for payment methods that supports secure card data. Sensitive payment data is stored only in certified Saferpay data centre. If the settings 'Is Save Card Available?' is Active in Payment method configuration page, then logged in customers can save and use their card for future transactions.
